

# PRINCIPLE GUIDELINES FOR OUR WORK

## PULMONARY DRUG DELIVERY – INTELLIGENT TECHNOLOGY FOR BETTER INHALATION

### OUR PRINCIPLE

Pulmonary drug delivery will be a key technology in future medicine by treating respiratory diseases as well as delivering drugs to the lungs for systemic absorption.

As a competence center for inhalation technology and aerosol therapy, it is our goal to be the partner of choice for the pharmaceutical and biotech industry. Our technology in combination with new drugs builds new efficient therapy options for the future.

Our work is dedicated to the improvement life quality of patient. Thus, we strictly reject development requests that obviously do not further human health.

## CUSTOMERS AND PATIENTS

Today's challenges and problems of our customers will be the basis for tomorrow's products. We are always focusing to align and improve our activities in view of superior customer satisfaction.

### EMPLOYEES

The mission of our corporation can only be fulfilled when corporate goals are harmonized with personal goals of the people working for Activaero.

We support personal development by training. In that way we steadily improve the quality of our work and the independence of our employees. We think that changes are chances for our development.

Employees at Activaero have several options to participate in our corporation and its success. We practice open communication between employees and management. At Activaero, decisions are taken transparently.

## OUR BUSINESS PARTNERS

From all partners who take part in our business process, we expect maximum effort and quality. We are happy about the success of our partners, since their results also help to achieve our mission.
